SEPTEMBER 2015

NEW!

X Conduit Bodies

Gibson Stainless is introducing a new configuration to its conduit body product line. The "X" conduit body has now been added to the line that contains the C, LB, LL, LR, T, and TB styles. The "X" is currently available in the 3/4" and 1" sizes.

Conduit bodies are designed to make 90° bends, to change the route of conduit, and/or to make wiring pulls and connections. These Form 8 conduit bodies permit simple, easy installation using ordinary hand tools. A flat design provides extra wiring capacity.

Each conduit body is supplied complete with a cover, gasket and Type 316 SS screws.

In Stock Now and Available for Immediate Shipment.
