

GIBSON STAINLESS[®]

& SPECIALTY INC

www.gibsonstainless.com

Dedicated to Quality, Committed to American Manufacturing

As an American-owned company dedicated to quality and transparency across all of its work, Gibson Stainless & Specialty is proud to stand behind its “Made in USA” ethos. We make qualified claims, ensuring that we are very clear in terms of our products’ country of origin. We will not state “Made in USA” unless the product is 100% Made in USA (manufactured in the United States, from melt to final assembly, on every component). If there is an imported component, or a product itself is a direct import, we make it known.

All of the castings in our primary product lines are 100% domestic, poured in American foundries. All of our original products, from beam clamps to conduit bodies, have always been cast in the United States. Machining, finishing, inspection, assembly and packaging are done at Gibson Stainless by Gibson Stainless employees.

Every product’s country of origin can be found in our catalog, on our website, and in this guide. We indicate which products are 100% Made in the USA. We also show which products have a foreign component and which ones are direct imports.

In order to confidently state the country of origin of our products, it is our policy to contact any and all of our material suppliers to obtain a certificate stating the origin. If a country of origin certificate is needed, we are happy to provide one. We are committed to providing American-made products for the electrical industry and will continue our efforts to provide products that are all 100% Made in USA.

INDUSTRIES SERVED

Food & Beverage
Wastewater Treatment
Pulp & Paper
Petrochemical
Chemical Processing
Infrastructure
Marine

Various industries and projects now require sourcing products with a specific country of origin or ones that comply with sourcing regulations. Please visit our website to learn more about common regulations such as the Buy American Act, the Buy America Act, and the Buy American Provision of the American Recovery and Reinvestment Act (ARRA).

Country of Origin Guide

100% Made in USA

Product is 100% made in the United States, from melt to final assembly.

- Conduit
- Elbows, Nipples, Couplings
- Conduit Bodies
- Device Boxes
- Three-Piece Couplings
- Caps
- Floor Flanges
- Pulling Elbows
- Enlarger Bushings
- Chase Nipples
- One Hole Straps
- Two Hole Straps
- Clamp Back Spacers
- Strut Accessories
 - Strut
 - Post Bases
 - Spring Nuts
 - Square Washers
 - Angles
 - Plates
 - Channel Nuts
- Hazardous Location Fittings
 - GUA Series Conduit Bodies
 - EYS Sealing Fittings
 - Unions (UNF, UNY)
- 1/4" Beam Clamp
- Socket Plugs
- U-Bolt Plates
- Threaded Rod
- Split Ring Clamps, Extension Rods, and Mounting Plate
- Face Reducing Bushings
- Bushings (Insulated and Grounding)
- Cord Grip Connectors (without mesh)
- Liquidtight Connectors (Standard and Grounding)
- Hubs (Standard and Grounding)
- Locknuts (Standard and Grounding)
- Grounding Rod

Product May Contain Imported Component

Product is made in the United States, but may contain an imported component. The cost of the components manufactured in the United States exceeds 50% of the cost of all components.

- Cord Grip Connectors with Mesh (mesh)
- Hangers (bolt, hex nut)
- Two Piece Clamps (bolt, hex nut)
- Parallel Clamps (bolt, hex nut)
- Device Box Covers (screws, gasket)
- Ground Rod Clamps (bolt)
- 2000 Series Beam Clamps — part numbers 2003, 2004 (bolt)
- 2100 Series Beam Clamps (bolt)
- JTB Beam Clamps (set screw, jam nut)
- U-Bolts (hex nuts, raw material for u-bolt)
- Right Angle Clamps (hex nuts, raw material for u-bolt)
- Right Angle Beam Clamps (hex nuts, raw material for u-bolt)

Possible imported component listed in parentheses.

Imported

- Hex Head Plugs
- Hex Head Reducing Bushings
- Rod Couplings
- Hardware

**Please note: Any change in a product's country of origin will be updated immediately on our website.*
