**NEW!**

## Cord Grip Connectors

Cord grip connectors are designed to provide a means of terminating flexible cord or cable in devices, boxes, or enclosures.

Cord grip connectors provide a weather-tight seal and, when specified with a stainless steel mesh grip, prevent the transfer of tension from the cable to the terminals or joints contained within the device, box, or enclosure. In addition to pull-out protection, the strain relief mesh also helps to prevent over-bending and kinking of the cord.

Gibson Stainless stocks these fittings in Type 316 SS in sizes ½" – 1" and with or without mesh.

**In Stock Now and Available for Immediate Shipment.**
